- Ambu intubation head
- The rigidity of the chest is adjustable
- Airways open only when head is correctly extended
- Jaw thrust possible
- PC compatible
- Training mat integrated in the carrying bag

Ambu® Airway Man W + I

The Ambu Airway Man is a highly developed instruction- and training manikin that provides a remarkably lifelike representation of the human anatomy, particularly those features important to training in modern resuscitation.

Connection free

The Ambu Airway Man does not need cables or wires, which means it can be placed away from computers and power supplies. This gives a great amount of freedom while training and because there are no wires or cables lying around it gives an even more realistic scenario.

Mechanical Instrument

Version W:

The AmbuMan W (Wireless) models are equipped with a mechanical monitoring instrument as well as digital sensors showing effectiveness of the resuscitation. It also shows results achieved for insufflations volume and depth of external chest compression, as well as it indicates any stomach inflation and incorrect hand positioning.

AmbuMan W models can be connected to a computer through USB or WLAN using the Ambu CPR-Software for a more detailed analysis of the performed resuscitation.

Version I:

The AmbuMan I (Instrument) models are equipped with a mechanical monitoring instrument showing effectiveness of the resuscitation, including results achieved for ventilation volume and depth of external chest compression. Moreover it indicates any stomach inflation and incorrect hand positioning.

ACCESSORIES

Arms complete	234 000 704
Arms, legs, jogging suit trousers and bag	234 000 706
Jogging suit jacket	234 000 790
Jogging suit trousers	234 000 792
Legs with trousers	234 000 786
